

SECTION III: MEMBERSHIP CLASSIFICATION & DUES SCHEDULE

Membership with NMMA is open to any business entity that qualifies for any one of the Membership Classifications set forth below. Please reference the unique requirements for each of the three manufacturing division and Associate member categories.

- Boat Manufacturer Division (BMD):** A business entity that manufactures or imports boats.

NMMA Certification of BMD product is a requisite for membership within 12 months of joining NMMA. Learn more at nmma.org/certification.

The Grow Boating Engine Assessment is the primary funding tool which requires all BMD members to participate by paying assessments on the engines that are used in their boats.

BMD applicants outside North America must have a certificate of authority from at least one state of the United States showing it is legally authorized to conduct business in that state, thereby submitting to its jurisdiction. Without such proof, application for NMMA membership will not be considered by any propulsion manufacturing firm outside North America.

- Engine Manufacturer Division (EMD):** A business entity that manufactures marine propulsion engines.

EMD applicants outside North America must have a certificate of authority from at least one state of the United States showing it is legally authorized to conduct business in that state, thereby submitting to its jurisdiction. Without such proof, application for NMMA membership will not be considered by any propulsion manufacturing firm outside North America.

BMD and EMD Member Dues Schedule: Annual dues are based on the total North American marine sales for your company's most recently completed fiscal year. Please check the appropriate category.

Qualified import product must be manufactured outside North America and documentation must be provided indicating an exclusive relationship with the manufacturer.

- Accessory Manufacturer Division (AMD):** A business entity that manufactures marine equipment and materials used in the construction or upgrade of a boat or that produces a general marine-related product used to enhance the boating experience.

AMD applicants outside North America must demonstrate that they have obtained a certificate of authority from one state of the United States which shows that they are legally authorized to conduct business in that state, thereby submitting to its jurisdiction. Without proof of this certificate of authority your application for NMMA membership will not be considered.

AMD Member Dues Schedule: Annual dues are based on the total North American marine sales for your company's most recently completed fiscal year. Please check the appropriate category. 25% of the membership fee is dedicated to the support of the Grow Boating program:
